

PROJECT 1 – NETFLIX PRODUCT ANALYTICS DASHBOARD

Created By: Amit Kumar Khushwaha

Tools Used: SQL | Power BI | DAX | Data Modeling

DAX MEASURES USED

Total Revenue

Purpose: Calculates total subscription revenue generated from active users.

```
Total Revenue =  
CALCULATE(  
    SUM(netflix_cleaned_data[monthly_fee]),  
    netflix_cleaned_data[churn_status] = "Active"  
)
```

Total Users

Purpose: Calculates total unique users.

```
Total Users =  
DISTINCTCOUNT(netflix_cleaned_data[user_id])
```

Total Active Users

Purpose: Calculates currently active subscribers.

```
Total Active Users =  
CALCULATE(  
    DISTINCTCOUNT(netflix_cleaned_data[user_id]),  
    netflix_cleaned_data[churn_status] = "Active"  
)
```

ARPU

Purpose: Average Revenue Per User.

```
ARPU =  
ROUND(  
    DIVIDE([Total Revenue],[Total Users],0),  
    2  
)
```

Churned Users

Purpose: Calculates total users who cancelled subscriptions.

```
Churned Users =  
CALCULATE(  
    COUNTROWS(netflix_cleaned_data),  
    netflix_cleaned_data[churn_status] = "Cancelled"  
)
```

Churn Rate

Purpose: Measures percentage of users lost.

```
Churn Rate =  
ROUND(  
    DIVIDE([Churned Users],[Total Users],0),  
    2  
)
```

Retention Rate

Purpose: Measures percentage of retained users.

```
Retention Rate =  
1 - [Churn Rate]
```

Revenue Lost Due To Churn

Purpose: Calculates revenue lost from churned users.

```
Revenue Lost Due To Churn =  
CALCULATE(  
    [Total Revenue],  
    netflix_cleaned_data[churn_status] = "Cancelled"  
)
```

Avg Watch Time

Purpose: Measures average user engagement time.

```
Avg Watch Time =  
AVERAGE(netflix_cleaned_data[watch_time_minutes])
```

Avg Session Count

Purpose: Measures average platform usage frequency.

```
Avg Session Count =  
AVERAGE(netflix_cleaned_data[session_count])
```

Heavy Viewer %

Purpose: Measures percentage of highly engaged users.

```
Heavy Viewer % =  
ROUND(  
    DIVIDE(  
        CALCULATE(  
            COUNTROWS(netflix_cleaned_data),  
            netflix_cleaned_data[viwer_Type] = "Heavy"  
        ),  
        [Total Users],  
        0  
    ),  
    2  
)
```

Avg Rating

Purpose: Measures overall content satisfaction.

```
Avg Rating =  
AVERAGE(netflix_cleaned_data[rating])
```

Avg Completion %

Purpose: Measures content completion performance.

```
Avg Completion % =  
AVERAGE(netflix_cleaned_data[completion_percentage])
```

High Risk Users

Purpose: Identifies users likely to churn.

```
High Risk Users =  
CALCULATE(  
    DISTINCTCOUNT(netflix_cleaned_data[Show_id]),  
    netflix_cleaned_data[data_since_last_watch] > 30  
)
```

BUSINESS KPIs COVERED

✓ Revenue Analysis

✓ ARPU Analysis

✓ Active User Analysis

✓ Churn Analysis

✓ Retention Analysis

✓ Revenue Loss Analysis

✓ Watch Time Analysis

- ✓ Session Analysis
 - ✓ Heavy Viewer Analysis
 - ✓ Content Rating Analysis
 - ✓ Completion Rate Analysis
 - ✓ High Risk User Identification
-

PROJECT OUTCOME

- Total Revenue: **\$58.55K**
- Active Users: **4,384**
- Churn Rate: **17%**
- Retention Rate: **83%**
- ARPU: **\$13.35**
- Heavy Viewers: **51%**
- Average Completion Rate: **92%**

Key Insights

- Premium Plan generated the highest revenue.
- Basic Plan showed the highest churn rate.
- Laptop users recorded the highest engagement.

- Romance and Sci-Fi achieved the highest completion rates.
